

Apistogramma lineage data

Authored by Jessica Bullock

Lineage as a categorical variable for *Apistogramma* species

Data archived in this file are interpreted from Tougard et al 2017

‘NA’ for missing data

Fields are defined as follows:

species: species from the genus *Apistogramma*

lineage: lineage categories 1-4 from the four major clades of *Apistogramma* determined by the molecular analysis and phylogenetic tree construction in Tougard et al 2017.
